Exhaust Only Canopy Type Kitchen Hood - Model EC / Model EC-I Specifications and Options

Hood Specifications:

- **-Material:** Exposed hood areas constructed of 18 gauge type 304 stainless steel with # 3 polish. Unexposed areas constructed of 18 gauge aluminized steel.
- **-Construction:** Exterior shell of hood is continuously welded liquid tight per NFPA-96. All exposed joints and seams are polished to the original finish. Hood front is double shell construction for added hood front rigidity at all hood lengths.
- -3" Rear Standoff: Non-insulated, factory installed at rear of hood provides 3" clearance to rear wall.
- **-Lights:** U.L. Listed Incandescent type light fixtures located on 3' to 4' centers. Lights include shatterproof globes. Lights are pre-wired to junction box at top of hood.
- **-Filters**: U.L. Classified heavy duty aluminum baffle type grease filters located in hood filter frame assembly. Filters are removable for cleaning.
- **-Grease Container:** Concealed stainless steel removable grease container located in hood interior isolated from airstream.
- **-Hanger Brackets:** Heavy steel 6" uni-strut hanger brackets at hood top with adjustable spring loaded rod coupling for 1/2" threaded hanger rod.
- **-Exhaust Duct Collar:** 3" High Exhaust duct collar is factory installed in top of hood. Duct collar contains perimeter welding flange for field welding of exhaust duct.
- -Approvals: Hood is ETL Listed to conform to U.L. 710 standards. Hood is NSF Listed and built in strict accordance with the latest edition of National Fire Protection Association, NFPA-96.

Hood Options:

- -Material: Entire hood constructed of 18 gauge or 16 gauge stainless steel or aluminized steel.
- -Lights: U.L. Listed Recessed fluorescent type light fixtures, double tube style in 3' or 4' lengths.
- **-Filters:** U.L. Classified heavy duty stainless steel baffle type grease filters.
- **-Grease Extractors:** All stainless steel construction high velocity grease extractor for up to 95% grease containment.
- **-Switch Panel:** Hood mounted or provide loose for wall mounting. Panel may contain various light and fan switch combinations as required for system operation.
- -3" Standoff: Insulated or Non-insulated, factory installed at hood ends or top as required for clearance to combustible or limited combustible surfaces.
- **-Ceiling Closure Panels:** Closure panels to close off space between top of hood and ceiling as required can be factory installed to hood top or provided loose for field installation.
- -Side Skirts: Left or Right end skirt to close off end of hood as required.
- -Wall Panels: S/S construction wall panels provided loose for field installation behind hood.
- **-Fire Control Cabinet:** Fabricated onto left or right end of hood to contain fire system controls and electrical controls as required.
- **-Fire System Piping:** Piping of hood for wet chemical fire suppression system. Exposed piping includes s/s or chrome sleeves.
- -Makeup Air Plenums: Model RS (Rear Supply) or Model FP (Front Perforated) makeup air plenum provided loose for supply makeup up to 90% of Exhaust.

Exhaust Only Canopy Type Kitchen Hood - Model EC / Model EC-I **CFM Information Data**

CFM Information Data - Wall Mounted Application - Model EC

Cooking Equipment	Average Cooking Surface Temp. Degrees F.	Exhaust CFM Per Foot of Hood Length	Supply CFM - Hood (Percentage of Exhaust)	Supply CFM Introduced Into Kitchen Area
Light Cooking Load -	250 to 400	152	NA	up to 100%
Ovens, Kettles, Ranges,	Degrees F			
Steam Equipment,				
Rotisseries				
Medium Cooking Load -	400 Degrees F	200	NA	up to 100%
Griddles, Fryers,				
Braising Pans, Skillets, Salamanders, Upright Broilers				
Heavy Cooking Load -	600 Degrees F	275	NA	up to 100%
Electric or Gas Char-				
Broilers, Wok Ranges				

Note: See Table 'A' for other CFM data and hood duct collar size information.

CFM Information Data - Back to Back Island Mounted Application - Model EC-I

Cooking Equipment	Average Cooking Surface Temp. Degrees F.	Exhaust CFM Per Foot of Hood Length	Supply CFM - Hood (Percentage of Exhaust)	Supply CFM Introduced Into Kitchen Area
Light Cooking Load -	250 to 400	304	NA	up to 100%
Ovens, Kettles, Ranges,	Degrees F	(152 Per Side)		
Steam Equipment,				
Rotisseries				
Medium Cooking Load -	400 Degrees F	400	NA	up to 100%
Griddles, Fryers,		(200 Per Side)		
Braising Pans, Skillets, Salamanders, Upright Broilers				
Heavy Cooking Load -	600 Degrees F	550	NA	up to 100%
Electric or Gas Char-		(275 Per Side)		
Broilers, Wok Ranges				

Note: See Table 'F' for other CFM data and hood duct collar size information.

<u>Hood Internal Static Pressure Losses</u> **Light Cooking Load**: Exhaust = .55" (w/ Baffle Type Filters); .75" (w/ GRX High Velocity Extractors) Medium Cooking Load: Exhaust = .60" (w/ Baffle Type Filters); .85" (w/ GRX High Velocity Extractors) Heavy Cooking Load: Exhaust = .72" (w/ Baffle Type Filters); .97" (w/ GRX High Velocity Extractors)
