Exhaust & Internal / Front Supply Kitchen Hood - Model SCS-FR / Model SCS-FR-I Specifications and Options

### Hood Specifications:

-*Material*: Exposed hood areas constructed of 18 gauge type 304 stainless steel with # 3 polish. Unexposed areas constructed of 18 gauge aluminized steel.

-Construction: Exterior shell of hood is continuously welded liquid tight per NFPA-96. All exposed joints and seams are polished to the original finish.

-3" Rear Standoff: Non-insulated, factory installed at rear of hood provides 3" clearance to rear wall.

-Lights: U.L. Listed Incandescent type light fixtures located on 3' to 4' centers. Lights include shatterproof globes and are pre-wired to junction box at top of hood. -Filters: U.L. Classified heavy duty aluminum baffle type grease filters located in hood filter frame assembly. Filters are removable for cleaning.

-Grease Container: Concealed stainless steel removable grease container located in hood interior isolated from air stream.

-Exhaust Duct Collar: 3" High Exhaust duct collar is factory installed in top of hood. Duct collar contains perimeter welding flange for field welding of exhaust duct. -Supply Duct Collar: 8" High Supply duct collar is factory installed in top of hood. Duct collar includes adjustable damper for ease of airflow adjustment.

-Supply Fire Damper: Located in Supply duct collar per NFPA-96. Fire Damper with fusible link closes in the event of fire to discontinue supply airflow into hood interior.

-Supply Plenum: Integral supply plenum introduces supply air to hood interior and through Supply Registers mounted on front of hood. Plenum includes 1" 3# density foil faced fiberglass insulation on interior of hood front to reduce condensation.

-Approvals: Hood is ETL Listed to conform to U.L. 710 standards. Hood is NSF Listed and built in strict accordance with the latest edition of the National Fire Protection Association, NFPA-96.

## Hood Options:

-Material: Entire hood constructed of 18 gauge aluminized steel, with Mill Finish.

-Material: Hood construction of 16 gauge stainless steel or aluminized steel.

*Lights:* U.L. Listed Recessed fluorescent type light fixtures, double tube style in 3' or 4' lengths.

*-Filters:* U.L. Classified heavy duty stainless steel baffle type grease filters.

-Grease Extractors: All stainless steel construction high velocity grease extractor for up to 95% grease containment.

-Switch Panel: Hood mounted or provide loose for wall mounting. Panel may contain various light and fan switch combinations as required for system operation. -3" Standoff: Insulated or Non-insulated, factory

installed at hood ends or top as required for clearance to combustible or limited combustible surfaces.

-Ceiling Closure Panels: Closure panels to close off space between top of hood and ceiling as required can be factory installed to hood top or provided loose for field installation.

-Side Skirts: Left or Right end skirt to close off end of hood as required.

-Wall Panels: S/S construction wall panels provided loose for field installation behind hood.

-Fire Control Cabinet: Fabricated onto left or right end of hood to contain fire system controls and electrical controls as required.

-Fire System Piping: Piping of hood for wet chemical fire suppression system. Exposed piping includes s/s or chrome sleeves.

# Exhaust & Internal / Front Supply Kitchen Hood - Model SCS-FR / Model SCS-FR-I CFM Information Data

Cooking Equipment	Average Cooking	Exhaust CFM Per Foot of Hood	Supply CFM Hood Interior	Supply CFM Hood Front
	Degrees F.	Length	(Percentage of Exhaust)	(Percent of Exhaust)
Light Cooking Load -	250 to 400	230	70%	20%
Ovens, Kettles, Ranges,	Degrees F			
Steam Equipment,				
Rotisseries				
Medium Cooking Load -	400 Degrees F	300	70%	20%
Griddles, Fryers,				
Braising Pans, Skillets, Salamanders, Upright Broilers				
Heavy Cooking Load -	600 Degrees F	Consult		
Electric or Gas Char-		Factory		
Broilers, Wok Ranges				

CFM Information Data - Wall Mounted Application - Model SCS-FR

Note: See Table 'E' for other CFM data and hood duct collar size information.

### CFM Information Data - Back to Back Island Mounted Application - Model SCS-FR-I

Cooking Equipment	Average Cooking	Exhaust CEM	Supply CEM	Supply CEM
Cooking Equipment	Surface Temp	Per Foot of Hood	Hood Interior	Hood Front
	Dogroos E	Longth	(Porcontago of Exhaust)	(Porcont of Exhaust)
	Degrees F.	Lengin	(Fercentage of Exhaust)	(Fercent of Exhaust)
Light Cooking Load -	250 to 400	460	70%	20%
Ovens, Kettles, Ranges,	Degrees F	(230 Per Side)		
Steam Equipment,				
Rotisseries				
Medium Cooking Load -	400 Degrees F	600	70%	20%
Griddles, Fryers,		(300 Per Side)		
Braising Pans, Skillets, Salamanders, Upright Broilers				
Heavy Cooking Load -	600 Degrees F	Consult		
Electric or Gas Char-		Factory		
Broilers, Wok Ranges				

Note: See Table 'K' for other CFM data and hood duct collar size information.

### Hood Internal Static Pressure Losses-

Light Cooking Load : Exhaust = .55" (w/ Baffle Type Filters) ; .75" (w/ GRX High Velocity Extractors) Supply = .25" Medium Cooking Load : Exhaust = .60" (w/ Baffle Type Filters) ; .85" (w/ GRX High Velocity Extractors) Supply = .30"
